

Dear colleagues of Mine Surveying and Geodesy of INRTU

I was deeply saddened to learn of the death of my old friend Mr. Anatolii!

He devoted all his life to the cause of international mine surveying, built a bridge for the development of mine surveying and the exchange and cooperation of mine surveying in various countries, and made an indelible contribution!

His death is a great loss to the International Society of Mine Surveying( ISM)!

Personally, I have received invaluable support and help from him. We have met dozens of times and met many times.

I am deeply saddened and sorry that he has passed away.

Special regards to the families of Mr. Anatolii!

Hua-yang Dai

Member, International Society of Mine Surveying  
Professor, China University of Mining and  
Technology (Beijing)
