

Irkutsk State Polytechnic University, Russia:

Professor Anatoly Okhotin, President of XVII of International Society for Mine Surveying, died after being hospitalized with a brain haemorrhage. We are deeply saddened!

Anatoly is the outstanding President of the International Society for Mine Surveying. He was dynamic, led ISM members in more than 40 countries, and successfully organized Norway Presidium Meeting in 2017, Uzbekistan Presidium Meeting in 2018, and XVII Congress in Russia in 2019, which increased the influence of ISM.

Anatoly is an advocate for strengthening the training of young scholars. ISM graduate summer schools had been held in Hangzhou of China, Irkutsk of Russia and other places. It has made outstanding results!

He is an activist for international mine surveying. He devoted his life to the international mine surveying, promoted its development, and made an indelible contribution to this purpose!

His death is a great loss to ISM! We express the deep condolences on the passing of President Anatoly! We express the deep condolences to his family!

International Society for Mine Surveying

President of XVIII of ISM
